Figure 7.6 One possible relational database state corresponding to the COMPANY schema.

that we call COMPANY = {EMPLOYEE, DEPARTMENT, DEPT_LOCATIONS, PROJECT, WORKS_ON, DEPENDENT}. Figure 7.6 shows a relational database state corresponding to the COMPANY schema. We will use this schema and database state in this chapter and in Chapters 8 through 10 for developing example queries in different relational languages. When we refer to a relational database, we implicitly include both its schema and its current state.
